

Title: Finite Mathematics, First Edition
Authors: Man M. Sharma, Clark Atlanta University
 Fisseha Abebe, Clark Atlanta University
ISBN: 978-1-888-469-99-8

497 pages : 8 1/2 x 11 : 4 Color : Soft Cover

Teaching and Learning Resources:

Student Access Code packaged with each new copy of the text book

Online Teaching and Learning at <http://www.educo-int.com>

Table of Contents

1. Sets, Real Numbers, Functions, Exponential and Logarithmic Function

- 1.1 Sets, Set Notation
- 1.2 Real Numbers, Inequalities, and Lines
- 1.3 Exponents
- 1.4 Basic Notations
- 1.5 Functions
- 1.6 Common Functions
- 1.7 Exponential Functions
- 1.8 Logarithmic Functions
- 1.9 The Properties of Logarithms

2. Mathematics of Finance

- 2.1 Simple Interest
- 2.2 Compound Interest
- 2.3 Annuities
- 2.4 Present Value of an Annuity and Amortization

3. Systems of Equations and Matrices

- 3.1 Systems of Two Linear Equations in Two Variables
- 3.2 Matrices and Linear Equations in Two Variables
- 3.3 Systems of Linear Equations and the Gauss-Jordan Method
- 3.4 Matrix Arithmetic
- 3.5 Inverse Matrices and Systems of Linear Equations

4. Linear Programming

- 4.1 Linear Inequalities
- 4.2 Two-Variable Linear Programming Problems
- 4.3 The Simplex Method for Standard Maximum Problems
- 4.4 Standard Minimum Problems and Duality

5. Probability

- 5.1 Definition of Probability
- 5.2 Addition Rule of Probability
- 5.3 Permutations and Combinations
- 5.4 Conditional Probability and Independence
- 5.5 Bayes' Formula
- 5.6 Random Variables and Distributions

6. Statistics

- 6.1 Random Samples and Data Organization
- 6.2 Organization of Quantitative Data
- 6.3 Alternative Forms of Frequency Distributions
- 6.4 Measures of Central Tendency
- 6.5 Measures of Variation
- 6.6 Quartiles and Percentiles (Ungrouped Data)
- 6.7 Normal Distribution and Binomial Approximation
- 6.8 Area Under the Standard Normal Curve
- 6.9 Finding Normal Probability Given μ and σ (Non Standard Normal Distribution)
- 6.10 Applications of The Normal Distribution
- 6.11 Normal Approximation to The Binomial Distribution
