

## Ideal for skills lab, learning/tutoring centers, or for self paced course.

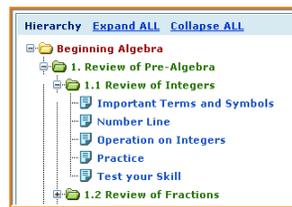

- ✓ Access to students and teachers from registered lab(s).
- ✓ Register any number of students for access to any course.

## General Information

- ✓ EducoSoft Lab License allows a specified number of simultaneous users to access the course contents and LMS features in a network environment connected to high speed internet service.
- ✓ Lab license is designed for a computer lab where the computers are all on the same local area network.
- ✓ Licenses are available for one lab or multiple labs in the institution. The system checks for the IP address of registered lab(s) within the institution.
- ✓ The system also checks for number of simultaneous users. If simultaneous users logged in are equal to the lab license seats, then another user can log in only after someone has logged out.
- ✓ Create Term, section, assign lab instructor, and register students by uploading an excel sheet.
- ✓ Lab licenses are valid for one year.

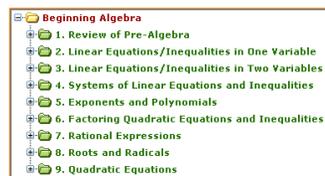

## Features

- ✓ Learn concepts through interactive tutorials with dynamic graphics.
- ✓ Reinforce learning through examples, each with several variations.
- ✓ Assess your learning with several sets of practice tests on each topic.
- ✓ Test your skill activity: check how fast you can do what is learned.
- ✓ Activity time records for each student
- ✓ Progress reports with details for each activity
- ✓ Communication and collaboration tools such as e-mail, announcements, discussion forum, and chat

## Courses Available

- |  |   |
|--|---|
| ✓ Basic Math   | ✓ Geometry                              |
| ✓ Pre-Algebra  | ✓ Pre-Calculus                          |
| ✓ Beginning Algebra ( <i>English &amp; Spanish</i> ) | ✓ Calculus I & II                       |
| ✓ Intermediate Algebra                               | ✓ Statistics                            |
